Live more Life

Are you Fully prepared in the event of Critical illness or Injury?

Hygeia Medevac Plan

With Quality Healthcare still lacking in Nigeria, many critical patients cannot be treated to International standards. As a result, Hygeia, in partnership with Aeroworx and MSO International are proud to offer you the Hygeia Medevac Plan, for your Peace of Mind in the event that local medical facilities cannot provide the appropriate medical treatment. The product is available to Nationals and residents of Nigeria.

This lifeline to critically ill or injured patients, could mean the difference between Life and Death.

This plan is exclusively sold by Hygeia, powered by Aeroworx and administered by MSO International, with clients being able to access Emergency Evacuation and Hospitalisation care in a wide variety of hospitals across Africa, Asia, UAE and the UK. This plan is suitable for people who do not travel often and therefore do not need a full international private medical insurance plan but wish to have security of access to overseas treatment in the event of critical emergencies

The key elements of this plan are:

- Full evacuation and in-patient cover of US\$500,000 per event
- Bed to Bed evacuation service and accompanying family member
- Visa on arrival service in SA and UK for the beneficiary and accompanying family member where they do not have visas
- Option of Naira payment where desirable
- Automatic second opinion from MSO Global
- No Claim discount every 24 months of cover if there is no claim
